PLANNING, BUILDING AND  
CODE ENFORCEMENT

Dear RPV councilmen and officers:

We were informed that Pump committee recently voted to recommend to city to allow paragliding from the knoll on dirt Crenshaw in Portuguese Bend open space and this will be discussed and decided at coming RPV city council meeting.

This area was supposed to be maintained as a passive open space rather than active recreation area. Paragliding has not been allowed anywhere in RPV so far.

Presented are **petitions to disallow paragliding in Del Cerro and surrounding area**, signed by affected residents. Included are photos showing para-glider flying, over power lines and houses.

As long time residents adjacent from suggested paragliding area, **we are absolutely against paragliding activities for following reasons.**

1. Para-gliders often fly over electric power lines along closed dirt Crenshaw Blvd. and houses intentionally or unintentionally. This is dangerous, and invading privacy of permanent residents.
2. Paragliding activities will attract large uncontrolled crowd with littering, environmental habitat damage and possibility of fire in this fire prone area.
3. There will be major liability issues in case of possible accident related to paragliding.

Sincerely

Hongpyo Henry and Julie Lee: 9 Amber Sky Dr. RPV
